

## B&G Committee Meeting 1/18/22

Location: Woodstock Elementary School – tour of facilities

Present: Joe Rigoli, Jim Haff, Matt Hough, Bob Crean

Capital Improvement Plan: the committee reviewed the CIP submitted by Jim Fenn & Joe Rigoli. The committee recommended moving the CIP to the full board for discussion. Suggestions were made about completing some projects in one fiscal year rather than spread the project out over multiple years.

Johnson Controls: Joe gave an update on JCI's energy work at our district schools. Work continues with lighting upgrades and building weatherization.

TPVS Dehumidifier: An update was given on the issues with the Dehumidification unit. The district is now seeking input and recourse from legal on how to proceed with the unit not functioning as designed.

Aerus Units: Joe gave a summary of the possible donation of Aerus air purification units from the Town of Reading's ARPA funds to Reading Elementary School. The committee recommended reaching out to the Town to engage in conversations about possibly using the funding to improve the existing HVAC system at RES rather than purchase 17 air purification units.

Meeting adjourned at 8:30 pm
