

A Book review is a great way to respond to literature and an even better way to integrate technology. After reading several books my class began browsing the Web to explore what a Book Review is all about.

I created the following template for my students to use when creating their reviews.

1. Which search engine are you using?
2. What is your research Question?
3. How do you know it is a good site?
4. Did you find reviews from children?
5. What is your sites URL (web address)
6. Did you find what you looking for?
7. Copy and paste 3 good reviews.
8. Analyze the similarities in the book reviews you chose and list 3.
9. Write your own book review based on what you know now.
10. Use spell check, edit for capitalizing and punctuation.
11. Remember to capitalize the title and give the Author.
12. Reread for fluency and practice reading aloud.

My power point presentation is what my students learned from this exercise.
